

## **Fun with Numbers**

### **Tuesday 10am - 11am and 1.30pm - 2.30pm**

Learn how to develop early maths skills through play with this 6 week course. Aimed at parents, carers and grandparents of young children, you will look at simple games and activities to help your child become confident with early number and counting skills.

Together you will share positive experiences of how children can learn through practical and interactive games. It will support you to become confident as you support your child as they learn all about the world of numbers and maths skills.

Nikki loves teaching maths and will share simple everyday things you can do to help your child become confident with their maths.
